

YOUR CUSTOMIZED
EMPLOYEE WELLNESS
SOLUTION

Discover what makes
us the most unique
provider in the
industry.

Personalized Employee Wellness Programs Based Around the Specific Needs, Goals and Resources of Each Partner Organization

- Only 15% of adults engage in regular vigorous physical activity, and 60% report getting essentially no exercise whatsoever from a regular leisure activity.
- 65% of the US population are overweight, and over 33% are literally considered clinically obese, which constitutes over 90 million Americans. This is a 7-10% increase in less than 5 years.
- Chronic illness, including heart disease, diabetes and obesity, accounts for 75% of health costs, according to the American Public Health Association.
- THE PROBLEM CLEARLY ISN'T GOING AWAY. According to the Industrial Physical Capability Services, Inc, new hire data demonstrates that applicants under the age of 40 actually have a greater prevalence for obesity than those over the age of 40.

See the "Wellness Quotient" tab at www.USCorporateWellness.com

The U.S. Centers for Disease Control and Prevention found that companies save \$3 to \$6 for every \$1 they invest in wellness. What makes US Corporate Wellness the premier choice to partner with you in improving the wellness of your team (and your bottom line)?

A focus on culture, supported by the tools (not the other way around):

- While we offer all the bells and whistles and incorporate a multitude of tools, the heart of our success is a focus on culture around the goals and pursuits of each individual. We are passionate about the value of our mission, and that passion is contagious.
- Extensive points of contact will keep the momentum flowing long after the start-up phase has come and gone.

Results

One of the basic tenets to the mission and vision of US Corporate Wellness is focusing on a change of culture across the entire team. As a result, you can expect to see industry-leading participation rates (and results).

Direct Cost Savings (based on 42 different independent articles)

- *Sick Time (28% reduction)
- *Work Comp and Disability (up to 30% decrease)
- *Health Care Costs (down 26%)

Indirect Cost Savings play an even larger role to the bottom line, including Recruitment, Retention, Morale and Energy Levels
