

#### URAC ACCREDITATION

US Corporate Wellness is one of 11 select firms to earn Full Accreditation (twice) through URAC as a Comprehensive Wellness Provider. This provides you with a higher level of confidence that your personal recommendation will stand tall.

#### SUPERIOR SERVICE

You have our promise that nobody in the industry will match our superior service levels. From response time to personalized interaction at all levels, you and your employee team members will experience the “Golden Rule” in action, every step of the way.

#### COMPREHENSIVE OPTIONS

Your needs as an organization are different from others, and they will continue to change over time. US Corporate Wellness provides customized options to meet your exact needs today, while providing opportunities for change and growth into the future.

#### CATALYST FOR CHANGE

At both an organizational and individual level, the Engage—Measure—Optimize strategy utilized by the US Corporate Wellness team will insure maximum results.

## How Important are Security and Compliance to Your Employee Wellness Program?

For an employee wellness program strategy to be effective over the long term, it must be engaging, affordable and pliable as employer needs and goals change over time. However, **none of this matters if security breaches or compliance issues develop.**

US Corporate Wellness has invested heavily in this area to insure we offer best-in-class security and compliance for our clients, and peace of mind for our participants. We are one of only 11 national firms to earn Full Accreditation through URAC as a Comprehensive Wellness Provider. In addition, in a recent Qualys SSL Labs security scan overview (featured by WSJ), we were the **highest rated** among all scanned wellness programs **for our web portal security.**

### Best-in-Class Security Goes Well Beyond the SSL Certificate

The US Corporate Wellness Compliance Matrix far exceeds typical wellness industry standards. Our server host meets PCI DSS Controls, HIPAA/HITECH Controls and ISO 27001 Controls using the following:

#### Network Layer

- Intrusion Detection
- Network Firewall (Hypervisor based)
- External Network Vulnerability Scanning
- Secure Remote Access (two-factor authentication)
- Encryption in transit

#### Server Layer

- Hardened Operating System
- Secure Remote Administrative Access
- OS Patching/Updating
- Anti-virus/anti-malware
- Log Management
- Time Synchronization
- File Integrity Monitoring

#### Perimeter Layer

- IP Reputation Filtering
- DDoS Mitigation

#### Application Layer

- Web Application Firewall

#### Physical Layer

- Rogue Wireless Scanning
- Physical Security

#### Administrative Controls

- Change Control
- Formal Risk Assessment
- Incident Response
- Data Backup
- Business Associate Contract
- Maintain Maintenance Records
- Access Control
- Security Audits
- Secure Data Deletion

**Superior Service...  
Real Results...  
Best in Class Security.**
